

MORE THAN JUST A BED

Relax in comfort with an adjustable base

More than just a bed

Your bedroom can be more than just a place to sleep. It can be a sanctuary, a place to rest and relax.

An A.H. Beard adjustable base allows you to find your ideal position for sleeping or relaxing. Select one of the pre-set positions or adjust the elevation of the head and foot to find a combination that lets you relax in the most comfortable way.

Why choose an adjustable base

An adjustable base not only makes sleeping and relaxing more comfortable, it can improve your general health and wellbeing. Customising your position can help improve your posture, circulation and digestion, relieve pressure points, ease breathing problems and reduce swelling in your legs.

Take the Pressure Off

When watching TV, reading a book or simply taking time out, raising both your back and legs in the Zero-G position helps to alleviate pressure on your lower back and spine. Just what you need to unwind at the end of a long day.

Breathe Easy

Raising your head slightly helps open up the airways, which can reduce snoring and ease symptoms of acid reflux.

Get Comfortable

Whether you are working, reading or watching TV in bed, an adjustable base allows you to enjoy your favourite activities in comfort.

Relax

Elevating the legs can help to reduce swelling, relieve lower back pain and promote good circulation.

UPLIFT

Full body incline

Massage

Full body lift

Underbed lighting

USB connectivity

ENRICH

Lumbar support

Massage

Underbed lighting

USB connectivity

INVIGORATE

Underbed lighting

Massage

USB connectivity

Relax in comfort with a full range of positions, massage and USB connectivity. Underbed lighting helps you find your way at night, while the memory button lets you save your favourite position.

REFRESH

Endless head & foot positions

Find your ideal position for sleeping and relaxing, or experience the feeling of weightlessness in the Zero G position.
